

Cross over to cool

Exceptional thermal protection for meal kits and other temperature sensitive shipments

2-piece liner placed in a cross over pattern provides thermal protection for up to 48 hours.

Cross over pattern places 35% more packaging at the top and bottom of the box, providing an air tight seal.

100% sustainable

100% made from recycled material
100% curbside recyclable

Insulating power of paper

Superior performance to foil bubble
